Charles University has become widely involved in implementing projects as part of the second programming period (2007-2013) for EU Structural Funds. The majority of project applications have been submitted to four Operational Programmes (OP): Education for Competitiveness; Prague – Adaptability; Prague – Competitiveness; Research and Development for Innovations.

To date, more than seventy Charles University projects worth over 2 billion CZK have been approved for the programming period 2007-2013.

Of this number, ten projects worth a total 1.3 billion CZK have been approved under two investment-based Operational Programmes of the European Regional Development Fund (OP Research and Development for Innovations, OP Prague – Competitiveness). A further 900 million CZK of funding has been approved as non-investment support for training (OP Education for Competitiveness, OP Prague – Adaptability) via more than sixty projects assisted by the European Social Fund.

In addition to projects where Charles University is the principal coordinator, the University is also involved as both a funded and non-funded partner in a further 60 projects managed by other universities and institutions in the Czech Republic (Masaryk University, Palacký University in Olomouc, the Academy of Sciences of the Czech Republic, etc.). Funding received via these projects amounts to more than 90 million CZK.

Operational Programme projects implemented by Charles University in 2007-2013 and co-financed from EU Structural Funds (as of 01-05-2013)
