
MUDr. Karel Bláha

Assistant of the Division of General Practice

He grew up surrounded by general practitioners from his family and never wanted to do anything else.

"I was already involved in the running of the practice as an assistant when I was a student."

He used the experience he gained to consult for medical software design companies.

He prepared for specialization in the Second Internal Medicine Department of FNB.

Since finishing his specialization diploma he has been working as a general practitioner in Prague 7, where he has been the district chairman of the SPL since 2016.

He is interested in associated practices.
