

**Anne, UHD**

The UHCC was an incredible opportunity for me to apply my knowledge hands-on. Working in teams with members from all kind of disciplines widened my view and challenged me to solve problems creatively.

**Martina, UniMi**

I can happily say that this experience helped me in developing team working abilities. The UHCC gave me the opportunity to apply the knowledge I had gained so far in my own field of study, and explore beyond it into the areas of my teammates. I would recommend anyone who enjoys collaborating on projects to try it out.

Adel, CU

As I believe that academia should be involved more in solving "real life" challenges and cooperating with different stakeholders, UHCC provided the opportunity to experience it.

4EU+ Urban Health Case Challenge (UHCC)

What is UHCC about?

Take a look at what the students experienced during last year's case challenge!

Aysha, CU

The first-hand experience at the challenge has been great, as it instilled great teamwork, management of practical knowledge to a real-life crisis without losing out on the fun of doing it. As a team scattered all over the world then, amidst the pandemic we learnt to be resilient to an ongoing human crisis and work together as a team and get to know alike minded people through the platform.

**Andrzej, UW**

UHCC is a great opportunity to meet new people who want to do something more. I really enjoyed the time spent with my team and I think that other teammates have the same feeling.

**Karoline, UCPH**

The Urban Health Case Challenge is a perfect opportunity to gain insight into disciplines' approach to a real-world issue. By working together across cultures and faculties, I acquired new and useful tools to approach challenging topics.
