## PBE 2025

Dear colleagues, dear teachers, we cordially invite you to the 23rd annual conference Project-based Education and other Student-Activating Strategies and Issues in STEAM Education, which will take place on November 7–8, 2025, in the new premises of the Faculty of Mathematics and Physics of Charles University in Prague (IMPAKT Pavilion in Troja). This year's conference is dedicated to you, teachers of primary and secondary schools. The program includes not only plenary lectures and research results in the field of science education, but also many workshops and sample lessons that you can take directly into your own teaching. The conference will be an opportunity not only to draw inspiration from experts and colleagues, but also to meet each other, share experience, and establish new professional friendships. If you would like to present a lesson, workshop, or demonstration of a teaching unit, we will be happy – we welcome the active participation of teachers with practical presentations!

Registration for the conference is open until October 15, 2025, via this [form](#) . We look forward to meeting you and believe that together we will create an inspiring atmosphere. Don't forget to follow the conference [website](#) , where we will add new information.
